

## **aim AS301DTS won the 2010 COMPUTEX TAIPEI Gold Awards**

Formosa21 is proud to announce its **aim AS301DTS**, a USB Audio Dongle that integrates with DTS Surround Sensation Headphone™ won **COMPUTEX TAIPEI Design & Innovation Awards 2010**. On 6/1/2010, Computex chose **aim AS301DTS** in 4 of the 34 winners for the **COMPUTEX TAIPEI Gold Awards 2010**. This Gold Awards affirmed the industry design and technologies integration capabilities of Fomosa21.

aim AS301DTS uses Vacuum Tube as design objective. The 18K gold cap increases the product value. The Cap-less (capacitor-less) output circuits extends low frequency band. Through a pair of headphones, the built-in DTS Surround Sensation Headphone™ Technology allows users to have the best audio surround sound effects on movies or music. When you play back the multi-channel audio content, it mixes the low frequency effect to the other channels that enhances the solid bass, especially for the movie content.

Recently, more and more famous movies, such as **AVATAR, JURASSIC PARK, X-MEN** and **THE TWILIGHT SAGA: NEW MOON** adopted DTS to provide the best sound quality. Formosa21 works with DTS closely to design the **world first USB Audio Dongle with DTS Surround Sensation™** Headphone Technology. Users can enjoy the DTS Surround Sound effects on the movies through netbooks or notebooks.

### **Features**

- Unique transparent vacuum tube appearance
- USB plug & play, uses standard USB driver \*
